

## Risk Management Workshop

# *Managing Rainfall Risk*

The USDA's Risk Management Agency, RightRisk, LLC, and University of Nebraska-Lincoln Extension invite you to learn about risk management tools and techniques to manage precipitation risk.

Date: September 11, 2008

Time: 7:30 P.M.

Place: UNL Extension Office in Kimball, Nebraska

Participants in this workshop will enjoy an interactive experience while they learn about emerging risk management tools for managing precipitation risk. In the 2009 crop year, the pasture, rangeland, and forage (PRF) crop insurance program is expected to be expanded to include all counties of Nebraska. Participants will learn about this product and have a chance to experience using it on the Oasis Ranch, a newly released Ag Survivor simulation designed to teach producers about managing precipitation risk. Participants will enjoy the fun, risk-free workshop environment that will foster new ways of thinking about risk management and encourage you to discover the right level of risk for you and your operation.

Presented by: Jay Parsons and Dana Hoag, RightRisk, LLC

Funding support provided by: USDA Risk Management Agency

Know how. Know **now.**
